A HEART FOR INGA

# INGA-SAURUS COLOURING BOOK

Inga loves dinosaurs, she has a big collection of them, but Inga also has an extremely rare heart defect and needs a life saving operation urgently.

To help raise money for her surgery in the USA - the only place in the world performing such specialist heart surgery - we've created the Ingasaurus colouring book.

We invited artists and illustrators from around the world to donate a dinosaur, creating this dino-tastic collection ready for your favourite colouring pencil!

[Download PDF](#)

Or, simply share Ingasaurus with some of your friends >

A heart for Inga

Bart's mom, Inga, has an extreme form of Ebstein's Anomaly, a rare heart defect. At five years old, she is already halfway through her life without the heart surgery she needs to survive.

This surgery is only available at the Boston's Children's Hospital in the United States, far from Inga's home in Poland. Her family need to raise £250,000 by the end of March 2023 to fund this life-saving treatment and give Inga the best possible chance of a healthy, normal life.

Any donation you can give to help Bart's family reach their fundraising goal would be enormously appreciated.

Your cretaceous colouring

Have you had a roarmming time? Send us a photo of your coloured masterpiece or share your Cretaceous colouring with us on Facebook and Twitter #ingasaurus.

Huge thanks to all of the amazing artists who have made this book possible.

## Loading script asynchronously as a Promise in JavaScript

February 3, 2021 • 1 min read

In most projects, an external library must be used (e.g. YouTube Player, Google Maps...), so the idea is to create a function to load the script asynchronously using Promise that will be resolved when the script is loaded. We can then trigger actions in the Promise and ensure that everything is executed correctly when loaded.

```
const loadScript = (src, async = true, type = "text/javascript") => {
  return new Promise((resolve, reject) => {
    try {
      const tag = document.createElement("script");
      const container = document.head || document.body;

      tag.type = type;
      tag.async = async;
      tag.src = src;

      tag.addEventListener("load", () => {
        resolve({ loaded: true, error: false });
      });

      tag.addEventListener("error", () => {
        reject({
          loaded: false,
          error: true,
          message: `Failed to load script with src ${src}`,
        });
      });

      container.appendChild(tag);
    } catch (error) {
      reject(error);
    }
  });
};
```

Let's try to load a script

```
loadScript("https://www.youtube.com/embed_api")
  .then((data) => {
    console.log("YouTube script successfully loaded", data);
  })
  .catch((error) => {
    console.error(error);
  });
};
```

That's it!

Before you leave...

Thanks for reading! 😊

**Testimonials**

I have been working alongside Stefan for just over 5 years and they've been the most impactful years in my career so far. He's the only person I know in this business who somehow manages to perform like a machine and at the same time stay human. He works harder than anyone I've ever known and cares deeply about the work we do. He's incredibly passionate, has his finger on every pulse of our industry and has a wealth of inspiration and knowledge that's impossible to keep up with. He makes me want to be a better creative and a better person, every day.
